Subject: Emery Deep
CC: Daron Haddock; OGMCOAL

John,

Quick f.y.i.- according to our records, we're waiting for clean copies of the updated surface drainage control map for Emery Deep (Task ID #3586). If I remember correctly, you typically submit 6 copies.

The other thing was the Emery town well reports. Since the revision of Chapter 7, the plan calls for semi-annual data evaluations (See bottom of Table VI-17 on page VI-56), which puts us at three reports to date. Let me know where those are at.

I'll find out what the procedure is for permit renewals and get back to you.

Talk to you later this week.

Steve
